ARJUN SHARMA

FULL STACK DEVELOPER | .NET / C# BACKEND

+91-99273 71875 | as506347@gmail.com | Noida, Uttar Pradesh
LinkedIn: linkedin.com/in/arjun-sharma-69aa87175 | GitHub: github.com/Arjun-15

PROFESSIONAL SUMMARY

Results-driven .NET Engineer / Full Stack Developer with professional experience building and maintaining web applications, backend services, and RESTful APIs using C#, .NET Framework, ASP.NET Core, and .NET 8. Experienced in SQL Server queries and stored-procedure integration, JSON-driven dynamic forms, UI enhancements, unit testing, and integrating application capabilities with AI-accessible tools. Additional project exposure includes Redis, asynchronous messaging, JavaScript Canvas-based signature capture, and map functionality using Esri and Leaflet. Focused on clean, maintainable code, troubleshooting, and delivering reliable business features.

CORE TECHNICAL SKILLS

Languages	C#, JavaScript, SQL
Backend	.NET Framework, .NET 8, ASP.NET, ASP.NET Core, RESTful APIs, Web API, Entity Framework, LINQ
Database & Caching	SQL Server, stored procedures, relational database concepts, Redis, MongoDB
Frontend	HTML, CSS, Bootstrap, JavaScript, React.js (working knowledge), Razor Pages
Integration & Messaging	Third-party/API integration, MCP-based AI integration, asynchronous messaging exposure. RabbitMQ: no hands-on experience claimed.
Testing & Tools	Unit testing, Postman/API testing, Git, Visual Studio, SQL Server Management Studio
Mapping & Browser APIs	JavaScript Canvas, signature capture, Esri Maps, Leaflet

PROFESSIONAL EXPERIENCE

Product Engineer / .NET Engineer | SEW.AI (Smart Energy Water) | 2025 – Present

- Develop and maintain application features across .NET-based backend services and web UI components.
- Work with .NET 8 REST APIs and backend services, including service-layer execution of SQL Server stored procedures.
- Implement dynamic and smart form functionality driven by JSON configuration and application status settings.
- Build JavaScript Canvas-based signature capture functionality and work on mapping features using Esri and Leaflet.
- Resolve UI defects, implement feature updates, and support application troubleshooting and maintenance.
- Write and maintain unit tests to support faster verification and improve the reliability of project changes.

Software Developer | Great Developer Info Tech Pvt. Ltd. | June 2022 – February 2025

- Developed and maintained web application features using C#, ASP.NET/.NET Framework, and related web technologies.
- Worked on backend functionality, UI fixes, application configuration, and feature enhancements based on project requirements.
- Contributed to database-related tasks and application integration, with continued development of SQL query and stored-procedure skills.
- Collaborated with team members to investigate defects, implement fixes, and deliver requested application changes.

SELECTED PROJECT EXPERIENCE

MCP-Based AI Integration Layer

Developed an MCP-based integration layer in C# that exposes order, customer, inventory, and knowledge-base capabilities as AI-accessible tools and resources. Integrated SQL Server and Redis and worked with asynchronous messaging patterns; included authentication, authorization, validation, and audit logging.

Smart Forms & JSON-Driven Dynamic Forms

Implemented dynamic form behavior based on JSON configuration and supported status configuration features to make form behavior adaptable to application requirements.

JavaScript Canvas Signature Capture

Worked on browser-based signature capture using JavaScript and Canvas, including capturing user-drawn signatures for application workflows.

Map Functionality — Esri & Leaflet

Worked on map-related functionality using Esri and Leaflet, supporting interactive map features within the application.

Custom QR Code Generator — TheArjunSharma.DraganQR

Built a custom QR code generator in C# and published the package as a NuGet library: TheArjunSharma.DraganQR.

SmartWX Unit Testing

Developed .NET unit tests to enable faster verification of SmartWX functionality and support regression testing.

EDUCATION

Bachelor of Technology (B.Tech), Computer Science and Information Technology
Teerthanker Mahaveer University | 2018 – 2022

ADDITIONAL INFORMATION

Interested in backend engineering, API development, database optimization, application reliability, and scalable enterprise systems. RabbitMQ, Hangfire, Vault, and GCP Secrets Manager experience should be represented only if supported by actual hands-on work.
